

19 *C* *cont* an exterior of said first base through *said aperture*; *infix*

20 an electronic logic circuit coupled to receive electrical power and data signals

21 via said first and second electrical conductors, and generating control signals in dependence

22 upon said electrical power and data signals; and

23 *B* an electrical operator having a distal member radially reciprocating along an

24 *W/T* axis transverse to said longitudinal axis, in dependence upon said control signals between

25 a first orientation relative to said exterior surface enabling said reciprocation and a second

26 and different orientation relative to said exterior surface obstructing said reciprocation.

REMARKS

Claims 1 through 11 are pending in this application. Claims 11 is newly added.

In view of the foregoing amendments, arguments and remarks, all claims are deemed to be allowable and this application is believed to be in condition to be passed to issue. Should any questions remain unresolved, the Examiner is requested to telephone Applicant's attorney.

Respectfully submitted,

Robert E. Bushnell
